

KALISOP®

Premium Quality - For all Special Crops

**KALISOP®****max. 1 % chloride**

EC FERTILISER

Potassium sulphate 50 (+45) gran.**50 % K₂O** water-soluble potassium oxide**45 % SO₃** water-soluble sulphur trioxide (= 18 % S)

KALISOP®

- is a highly concentrated potassium sulphate fertiliser with 50 % K₂O and 45 % SO₃ in sulphate form.
- is water-soluble, so that the nutrients potassium and sulphur are immediately available to the plant.
- is nearly chloride-free (max. 1 % Cl) and is therefore the ideal potassium source for chloride-sensitive crops.
- has, in compared to other potash fertilisers, a lower salt index and is therefore especially suited for the fertilisation of valuable special crops in intensive cultivation systems.
- is the ideal fertiliser for crops with a high sulphur requirement. Sulphur improves the efficiency of the nitrogen fertilisation and has a positive impact on yield and quality.
- is not hygroscopic and therefore has a good storage stability.
- is certified for organic farming according to the regulations (EU) 2018/848 and (EC) No. 889/2008.
